PROJECTS

Employee Management System (React.js, PHP, Tailwind CSS, Framer Motion, APIs)   Jan - March, 2025

- Developed a full-stack employee management system for tracking attendance, shift requests, and leave management.
- Integrated location-based attendance tracking using APIs, storing data in a database for real-time access.
- Implemented admin functionalities such as approving shift changes, leave requests, and sending public/private notices.
- Utilized React.js for front-end, PHP for back-end, and Tailwind CSS for responsive design.
  Enhanced user experience with Framer Motion for smooth animations.

News Management System (HTML, CSS, Bootstrap 5, JavaScript)   Oct - Nov, 2024

- Developed a web-based news management system using HTML, CSS, Bootstrap 5, and JavaScript.
- Integrated NewsAPI to fetch real-time news data and displayed it dynamically on the website.
- Implemented responsive design for seamless user experience across devices.
